

Excel Assignment 2 – Data Exploration

Project Objective:

To clean and prepare a raw dataset using Microsoft Excel by handling missing values, correcting inconsistencies, removing duplicate records, and applying data formatting techniques to improve data quality and ensure the dataset is ready for accurate analysis.

Project Description:

Attributes: Product ID, Product Name, Brand Name, Quantity, Category, Price.

Column Description:

Column Name Description

Product ID Unique identifier assigned to each product.

Product Name Name of the product.

Brand Name Brand or manufacturer of the product.

Quantity Number of units available or sold.

Category Product classification (e.g., Electronics, Fashion, Kitchen).

Price Cost of the product in monetary value.

Tasks:

1. Handling Missing Values:

● Check for missing values in the 'Price' column. How would you handle products with

missing price information?

● If there are products with missing categories, propose a strategy to impute or deal

with these missing values effectively.

WORKED:

- Found the avg of the price column and found that 297.86 so filled all the blanks with that value.
- And I worked in category column, found blanks and typed as UNKNOWN.

2. Correcting Inconsistent Data:

- **Identify any inconsistent text formats present in the "Product Name" column.**

WORKED : Used clean, trim, proper func.

- **Identify any typos present in the "Category" column.**

- **Use the find and replace function to standardize the text formats in the "Product Name" column and fix any typos or misspellings in the "Category" column.**

WORKED: Used find and replace to replace Electroni to Electronics.

3. Removing Duplicates:

- **Identify any duplicate rows within the dataset based on the entirety of each row, and**

remove them if any.

WORKED: Used remove duplicate tab.

4. Splitting and Merging Data:

- **Split the "Product ID" column into two separate columns for " Manufacturing Date"**

and "Country Code". Remove unnecessary characters, if any.

WORKED: used Delimited TAB to separate.

- **Merge the "Brand Name" and "Product Name" columns into one column named "Product Brand".**

WORKED: Used =CONCAT func to merge columns.

5. Number Formatting:

- **Format the data type of the "Price" column to a currency format.**

WORKED: Used number tab and changed to US currency.

- **Format the "Manufacturing Date" column to display dates in the "DD-MM-YYYY " format.**

6. Conditional Formatting:

- **Apply data bar or color scales conditional formatting in the "Price" column.**

WORKED: Used conditional formatting tab and color scales.

- **Create a custom rule for conditional formatting in the "Category" column to highlight**

cells where the category is "Electronics."

WORKED: Used conditional formatting tab and text that contains.(highlighted Electronics and Unknown)
