

Excel Project

Project Objective:

Performed basic data exploration and analysis in Microsoft Excel using a product dataset containing Product ID, Product Name, Brand Name, Quantity, Category, and Price. Applied Excel functions such as COUNTIF, SUMIF, MIN, MAX, LEFT, and MID.

Data Description:

The dataset contains information about various products across multiple categories such as Electronics, Fashion, Kitchen, Outdoor, and Accessories. It includes details like Product ID, Product Name, Brand Name, Price, Quantity, and Category.

Column Description:

Product ID – Unique identifier for each product

Product Name – Name of the product

Brand Name – Brand associated with the product

Price – Cost of the product

Quantity – Available stock quantity **Category** – Product classification (Electronics, Fashion, Kitchen, etc.)

Task:

- Calculate the total price of all products in the dataset(using SUM func)

FORMULA - =SUM(G2:G35)
ANSWER - 10100

- Determine how many products exist in the dataset(COUNT func)

FORMULA - =COUNTA(UNIQUE(E2:E35))
ANSWER - 22)

- Calculate the average price of the products(AVG func)

FORMULA - =AVERAGE(G2:G35)

ANSWER - 297.0588235

- Identify the minimum price among all products (MIN func)

FORMULA - =MIN(G2:G35)

ANSWER - 30

- Identify the maximum price among all products (MAX func)

FORMULA - =MAX(G2:G35)

ANSWER - 1000

Logical Function – IF

- Create a new column named Price Range.
- Use the IF function to categorize products based on their price:
 - If Price $\geq$ \$500 → classify as High Price
 - If Price $<$ \$500 → classify as Standard Price

	J	
Category	Price Range	
Electronics	High Price	
	Standard Price	
	Standard Price	
Electronics	High Price	
	Standard Price	
Electronics	Standard Price	
	Standard Price	
	Standard Price	
Electronics	High Price	
	Standard Price	
Electronics	High Price	
	Standard Price	
	Standard Price	
Electronics	Standard Price	
Electronics	Standard Price	

- Use the SUMIF function to calculate the total price of products in the Electronics category.

FORMULA - =SUMIF(I2:I35,"electronics",(G2:G35))

ANSWER - 8050

- Use the COUNTIF function to determine the number of products with a price less than \$100.

FORMULA - =COUNTIF(G2:G35,"<100")

ANSWER - 11

5. Text Formatting – LEFT, RIGHT, MID

- Use text functions to extract information from the Product ID column.
- Create the following new columns:

- Create a new column named Day with the first 2 characters of each 'Product ID' using the LEFT function.
- Create a new column named Country Code by extracting the last 2 characters from the 'Product ID' column using the RIGHT function.
- Create a new column named Month by extracting the 4th to 6th characters from the 'Product ID' column using the MID function.

	A	B	C	D
	Product ID	Day	Country Code	Month
2	28-JAN-US	28	US	JAN
3	15-FEB-US	15	US	FEB
4	03-MAR-US	03	US	MAR
5	11-APR-US	11	US	APR
6	22-MAY-US	22	US	MAY
7	07-JUN-UK	07	UK	JUN
8	19-JUL-UK	19	UK	JUL
9	23-AUG-UK	23	UK	AUG
0	05-SEP-UK	05	UK	SEP
1	14-OCT-UK	14	UK	OCT
2	17-JUN-IN	17	IN	JUN
3	25-NOV-AU	25	AU	NOV
4	08-DEC-DE	08	DE	DEC
5	18-FEB-CA	18	CA	FEB
6	16-APR-ES	16	ES	APR
7	21-AUG-CA	21	CA	AUG
8	20-AUG-CN	20	CN	AUG
